

Release Notes

SQLBase - Version 12.0 SP1

Defects Fixed

- [SQLB-738] - SB Command Center: ability to move SQLTalk windows around
- [SQLB-1323] - Installer does not install Command Center service.
- [SQLB-1422] - SB Command Center: 'Check all' button in audit results and audit options
- [SQLB-1550] - SB Command Center: SQLTalk doesn't allow a 'quick' clearing of the input window
- [SQLB-1659] - SB Command Center: Doing a 'Show Data' on a German machine gives error 'Encountered an improper argument'
- [SQLB-1820] - Allow a selection of the 'TOP' x rows of data to insert into another table
- [SQLB-1823] - Select from a table ending abruptly when NULL is encountered
- [SQLB-1909] - Connectivity Administrator does not show a database that was added
- [SQLB-1970] - Duplicate rows are returned with a distinct clause
- [SQLB-2019] - SB Command Center: A task execution does not stop on an error
- [SQLB-2030] - DDEX Execute Stored Procedure does not accept input parameters
- [SQLB-2118] - Dropping an auto-increment column disallows inserts into the table
- [SQLB-2124] - Custom error messages no longer allowed in .NET applications
- [SQLB-2179] - MS Access generates extra parenthesis in a union query
- [SQLB-2192] - SB Command Center: Allow the settings for an audit to be saved
- [SQLB-2201] - READONLY database fails to connect after server restarting server and reconnecting
- [SQLB-2202] - SB Command Center: A 'Find' and/or 'Replace' when editing a trigger doesn't work properly

- [SQLB-2205] - SB Command Center: Can't create a not null with default column on an existing table
- [SQLB-2239] - SB Command Center: Cursor position changes after entering 'ctrl' + 'enter'
- [SQLB-2264] - SB Command Center: Tab controls icons/images don't display correctly in "Audit results" views
- [SQLB-2266] - SB Command Center: The audit Start and Stop menu button should toggle
- [SQLB-2282] - SQLBase 9.0.1 gets a timeout and 11.7 gets a deadlock
- [SQLB-2319] - SB Command Center: Execution plan not displayed
- [SQLB-2352] - .NET provider DataReader.HasRows is false before calling Read
- [SQLB-2361] - The SQLBase installer doesn't include gptconfig.exe and dberror.exe
- [SQLB-2364] - EDP - Country.sql is not included in a client-only MSI build
- [SQLB-2369] - EDP replaces entries in customer supplied sql.ini file
- [SQLB-2385] - Registration problem with SQLBaseOLEDB
- [SQLB-2388] - Server crash with a specific trigger execution - only on 64-bit
- [SQLB-2394] - The SQLBase.lic file needs to be protected from editing
- [SQLB-2399] - Auto-increment column is not updated correctly on a rollforward of logs
- [SQLB-2406] - Error 8303 when a specific stored procedure is executed - only on 64-bit version
- [SQLB-2407] - Error 1901 SYS ICV when an index contains an @MID clause
- [SQLB-2408] - Error 324 EXE IBV When using :param1 bind name in query but not in parameter name
- [SQLB-2415] - Stored procedure with return of long varchar is not correct
- [SQLB-2432] - ODBC connection crashes
- [SQLB-2435] - CommandTimeout in .NET provider needs to set server-side properties
- [SQLB-2436] - Missing registry entry for SB12 64-bit ODBC
- [SQLB-2437] - Loading two databases with a compressed unload file hangs the server
- [SQLB-2438] - Binding for insert type of SQLPSTRW into LONG VARCHAR incorrectly converts data
- [SQLB-2439] - Default path of unload/load paths has changed for SQLTalk
- [SQLB-2440] - Setting a server security password for a service crashes the Server Console
- [SQLB-2442] - Error 26 in EDP build
- [SQLB-2443] - SqlBaseCommand ExecuteNonQuery() doesn't parse dates correctly
- [SQLB-2446] - BACKUP SNAPSHOT command fails on Linux with CFO DBS (12012) error
- [SQLB-2447] - SQLTalk help file is not installed
- [SQLB-2453] - EDP Maker does not copy the sqlbase.lic file into the install directory - 64-bit only
- [SQLB-2461] - Executing a BACKUP SNAPSHOT causes crash/hang/corruption.

- [SQLB-2469] - .NET parser sees a constant of 'INTO' as invalid
